

Oregon Law Practice Management

Practice Management Tips for Oregon Lawyers

Acrobat.com Mobile

I am jazzed to hear about Acrobat.com mobile, a new iPhone app available from [scanR](#) at the iTunes Store. If you have an iPhone 3Gs, this app allows you to use your camera to scan documents directly into an [Acrobat.com account](#). Translation: free scanning and storage on-the-go.

[Acrobat.com](#) is an online collaboration site offered by [Adobe](#). Several levels of service are available. The [free account](#) includes:

- Five PDF conversions total
- Three person web conferencing
- Unlimited file downloads
- Online office applications
- Forum-based support

[Paid accounts](#) offer more features (unlimited PDF conversions, 5-20 person Web conferencing, etc.)

Acrobat.com mobile (free) + [Acrobat.com](#) (starter account free) = Very good price.

What do you think?
