10 Electronic Discovery Resources for Paralegals

By developing competence in e-discovery, paralegals position themselves to provide advice and guidance to attorneys who can then in turn sell the workflow benefits of e-discovery to their firms' clients.

In order to succeed in this area, paralegals must spend some time in ?the trenches? learning from their own cases and the situations faced by others paralegals, speaking directly with service providers, reading newsletters, and doing online research to develop a working knowledge of this and its particular set of challenges and issues.

The Legaco Express has done some research in order to put together a few e-discovery resources that allow our readers to get started, to stay current, or simply learn more about e-discovery:

1. **ABC's of E-Discovery**
   A blog by a paralegal for paralegals about the role of technology in e-discovery and document management.
